

# Grendel

The text describes Grendel as a subaquatic creature with “strong jaws” and strong teeth. I made sure to include these features in the drawing giving him gills and a rather large jaw. We are led to assume he is also human esque sized with out beowulf is able to grasp him in such a way. With these details in mind I have made him a reptilian based human with muscular features. With grendels monther being called “She-wolf” we are left to assume that grendel is hairy too, So I gave him fur. He also has a horn from being a “creature of satan”
